

CSSC

A multi-jurisdictional consortium established during BRAC 2005 to coordinate strategic planning and implementation in the areas of infrastructure, transportation, and workforce; demonstrating readiness to absorb and accommodate the transformation of Aberdeen Proving Ground (APG), its research, development, test and evaluation mission expansion and a highly-skilled technical and scientific workforce.

Our Mission

Today, the 52-member consortium continues to support and sustain the mission of APG while promoting the economic vitality of the Greater APG Region. The CSSC Office serves as a regional communications clearinghouse for our defense community, producing *CSSC Defense Daily* and *CSSC Asset*.
